## **Hit Effects Options**

Define the effects and how each hit type behaves. These hit types can later on be used in your moves.

## Hit Effect Group

- **Particle Effect:** A prefab with particle effects that is fired when the character gets hit by this hit type.
- Effect Duration: Time before effect prefab is destroyed.
- Sound Effect: What sound effect will be played when a move with this hit type hits.
- Stick to Character: If enabled, the effect prefab will follow the character.
- Freezing Time: The game will freeze for a very brief moment (in seconds) when a hit connects.

- **Auto Hit Stop:** When toggled it will use the freezing time value as a variant for both freezing the character being hit and the physics at play. Untoggle to use different variants (such as parry events).
- Animation Speed (%): When a hit confirms, the animation speed of both characters will be set for this value. By default, this is set to 0 (a complete freeze during the freezing time). *Example*: For a slow motion effect, set this to a value between 1 and 20%.
- Shake Character On Hit: During the freezing time, the character can shake very slightly giving a more convincing hit effect.
- Shake Camera On Hit: To make the hit more impacting, you can also set the camera to shake slightly during freezing time.
- **Shake Density:** How much shake will be applied to the camera and character during freezing time.
- Restart Animation on Hit:

Sort Layer on Hit (2D Only): If enabled, the sort layer will be set for the characters Sprite Renderer on Hit.

Code access:

UFE.config.hitOptions.weakHit

UFE.config.hitOptions.mediumHit

UFE.config.hitOptions.heavyHit

UFE.config.hitOptions.crumpleHit

UFE.config.hitOptions.blockHit

UFE.config.hitOptions.parryHit

UFE.config.hitOptions.customHit1

UFE.config.hitOptions.customHit2

UFE.config.hitOptions.customHit3

Code example:

```
void OnNewAlert(string alertMsg, CharacterInfo player){
    if (alertMsg == UFE.config.selectedLanguage.fight) {
        UFE.config.hitOptions.crumpleHit.shakeDensity = .lf;
    }
```
